## CLEAN UP THE WORLD CAMPAIGN 2018 BY SEAN BARBARA

This year's 'Clean Up The World' took place on Windmill Hill, with over 20 students and teachers participating. As a participant of the event I can gladly say that everyone who attended in the event worked very hard and did a great job at cleaning up the area. I must say that the allocated area we had to clean up was in an unfathomable state, rubbish was littered all over the place, plastics, metal, paper, styrofoam and even house hold products were found. This just goes to show that there is an unbelievable amount of rubbish being dumped on our very own Rock that we

hold as a symbol. Clean up the World is a movement to show everyone that even taking a little time out of your day can do so much for many people. We need to make the effort to throw away our litter and try to recycle what we can. This is all about creating a better future for ourselves and the future generation!

## OUR PRECIOUS ENVIRONMENT BY MARIAM ZINATI

Today, I will be talking to you about the environment and the damages we are inflicting on it.

Firstly, I want to discuss what human activities upset me the most. I never like seeing litter and plastic waste. Gibraltar suffers from this problem. Something needs to happen soon!

Secondly, the effects of these selfish population based activities affect our environment making it dirtier day by day because of the negligence of human beings. Any type of disturbance in nature's balance affects the environment terribly, which ruins human lives! We must all take an oath together to protect our natural environment and to keep it safe forever!

Thirdly, let us look at ways that we as individuals, and as a community, can help the environment: We could walk, use the bus, cycle, pick up litter, stop food waste, recycle, reuse, switch off, stop using plastic bags, plant or grow our own food and much, much more. Do something positive and take action!

Thank you for your time.
