LEVEL 2 AWARD

CERTIFICATE IN ENGINEERING AND TECHNOLOGY

INTRODUCTION

The Level 2 Certificate in Engineering & Technology is a vocationally related qualification that has been developed to provide learners with a greater sense of awareness and insights into the practices and processes of engineering and technology. This qualification allows for the learners to broaden their personal skills, knowledge and understanding within the engineering and technology sectors.

ENTRY REQUIREMENTS

- L1 Certificate in Engineering ***plus*** L1 Mathematics and English ***OR***
- 5 GCSEs at a minimum grade of an E or 3, or equivalent.

COURSE STRUCTURE

This qualification has a one-year duration.

The emphasis of the assessment of this qualification is in a 'hands on' approach and the final assessment of the units will take the form of internally assessed practical tasks and externally assessed multiple choice examination.

UNIT NO.	UNIT TITLE
Unit 1	Engineering Environment Awareness
Unit 2	Engineering Techniques
Unit 3	Engineering Principles
Unit 23	Electrical Installation Methods, Wiring And Circuit Protection

WORK PLACEMENT

Learners will be given the opportunity to attend a full week work placement with a local electrical contractor to enable them to broaden their skills, subject knowledge and understanding of this industrial field in practise. The acquired skills will need to be documented in the learner's log book.

Please be advised that these may be subject to change
